Is That Fast Enough

If you're producing artwork on a Macintosh®, you have probably discovered that bitmapped images are a far cry from the kind of PostScript® artwork being created with Adobe Illustrator 88™. Well, now there's a way to guarantee you'll always finish with PostScript quality, no matter how you start. Introducing Adobe Streamline, the newest member of our family of automated tools designed to help you simplify the production process.

Adobe Streamline automatically traces bitmapped images (either from an existing electronic file or scanned black and white line art) and converts them into Adobe Illustrator files. After an image has been converted, it can be used as-is, easily modified in Adobe Illustrator, or exported to any one of several page layout or word processing programs.

Once you discover everything you can accomplish with Adobe Streamline, you'll understand why we call it the high-speed production tool for graphic artists, technical illustrators, and desktop publishers.

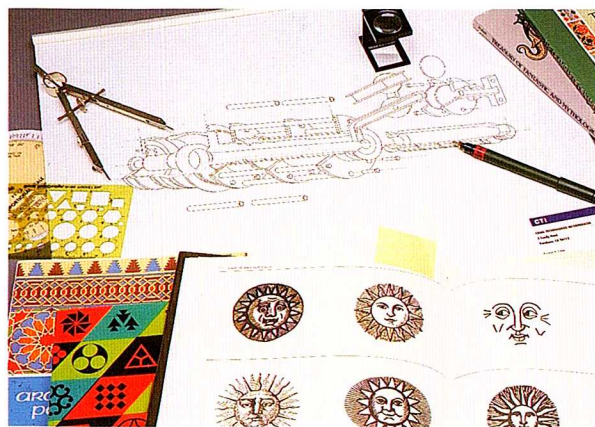

Introducing Adobe Streamline

ADOBE STREAMLINE™

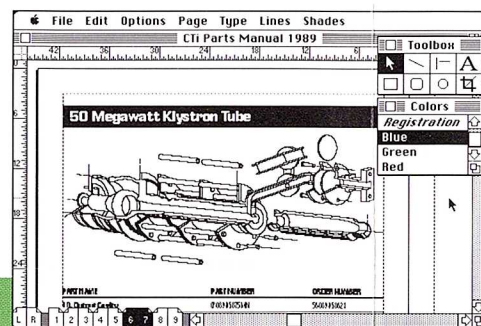

Adobe Streamline – simply the fastest line art conversion tool ever created.

HERE'S HOW IT WORKS...

FOR STARTERS...Adobe Streamline allows you to begin with any piece of black and white art or existing bitmapped files. No matter how you start, you'll have a PostScript file in seconds!

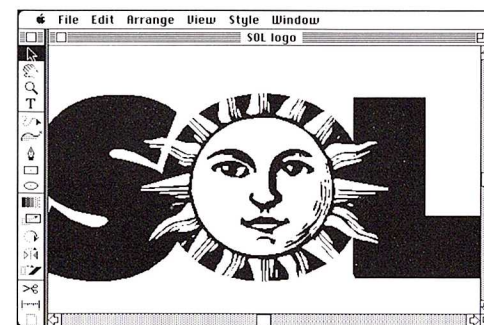

GO YOUR OWN WAY...Adobe Streamline enables you to quickly and easily export converted PostScript images into your favorite page layout program. And without modification, they can be used in newsletters, ads, and technical manuals.

Not only does Adobe Streamline increase productivity, it also enhances creativity. Because you will spend more time creating high quality artwork, when you spend less time producing it.

You will save all kinds of time by "streamlining" your existing illustrations into electronic art files. Then, sizing and placing them into your page layout program for hundreds of different applications.

OR GO THE ILLUSTRATOR WAY
...Once you've converted your bitmapped image into a PostScript file, you can automatically read it into Adobe Illustrator to change or refine it.

AND MAKE THE MOST OF IT...Imagine taking that original clip art and, in a matter of minutes, producing final artwork—for everything from high quality stationary to high image advertising!

If you want more information on how to add creative hours to your day, call Adobe Systems at 800-344-8335. Outside the United States and Canada, contact your local distributor as indicated on the back of this flyer.
